

VETERINARY ORTHOPEDIC MANIPULATION (VOM) TREATMENT and LIABILITY WAIVER/ RELEASE

Adriana Halpern DBA Flint Hill Equine & Canine Bodywork LLC

I, _____, do hereby release from any and all liability including negligence the VOM Practitioner; Adriana M. Halpern DBA Flint Hill Equine & Canine Bodywork LLC and agree to having Veterinary Orthopedic Manipulation performed as well as any Massage Techniques on my Pet(s):

- 1. _____
- 2. _____
- 3. _____
- 4. _____
- 5. _____

I Realize that:

- 1. As with all medical procedures, this technique is being applied without guarantee of cure or promise of relief. In clinical practice, 7-9% of cases do not respond to VOM.
- 2. The VOM technology is inherently non-invasive and safe. To date no animal has been injured with this method of diagnosis and treatment.
- 3. Like Veterinary acupuncture was for years, the AVMA still regards veterinary chiropractic techniques as "experimental" in the US. VOM in and of itself is **Not a chiropractic technique**, but would be grouped in this fashion.
- 4. The undersigned has been advised as to other treatment regimens such as medicine and surgery and has been encouraged to seek a second professional opinion, or has already done so.
- 5. I have received the "Healing Crisis" handout and understand that a healing crisis can occur as part of the natural healing process.

I, _____, wish to have VOM Diagnostic and Treatment Technology applied to my pet/animal as well as any other body work including but not limited to massage, Vetrostim, Myofascial release, essential oil therapy, homeopathy, nutritional counseling etc.
